BMD “MORE” Button

The BMD screen shows a number of selections/candidates at a time when voting. If there are more selections/candidates to choose from than can be seen, a more button appears at the bottom or top of the screen indicating that there are “More” selections. Tapping the “More” button will scroll the screen up or down allowing voters to see the selections available.

Informing Voters about the “More” Button:

The Vote Area Monitor should inform voters about the “More” button when the voter arrives at the Vote Area to vote on a BMD.

1. Inform voters that they can select the “More” button as they move through their selections on contests with candidates, as shown below.

2. Tapping the Up or Down “More” button will scroll through other available choices voters can select.

Example

Touching the “More” button
